About Me

Data Analyst experienced in KPI reporting, dashboard development, data quality, and performance analysis using Power BI, SQL, Excel, and Tableau. Skilled in transforming and validating data, identifying trends and performance gaps, and automating recurring reports to improve reporting efficiency. Strong at turning complex data into clear, actionable insights and collaborating with stakeholders to support data driven decisions.

Experience

Aim Brilliant, *Junior Data Analyst*

Texas, USA

Jan 2021 – Jul 2022

- Examined business and operational data using SQL and Tableau to identify trends, patterns, and actionable insights supporting decision making.
- Developed interactive KPI dashboards and scorecards to improve reporting efficiency and support performance tracking.
- Maintained data accuracy, consistency, and reliability across reporting datasets, supporting performance monitoring and decision making.
- Developed data models to streamline reporting workflows and enhance accessibility of insights for stakeholders.
- Collaborated with cross-functional stakeholders to gather requirements and translate them into scalable analytical solutions.
- Gained exposure to modern cloud data platforms such as Snowflake for querying and managing large scale datasets.

Diya Metal Industries, *Data Analytics Intern*

Jamnagar, India

Mar 2020 – Sep 2020

- Applied Python and SQL to perform data analysis and manipulation on business datasets.
- Integrated SAP data with Power BI to develop interactive dashboards, enhancing data visualization and supporting decision making.
- Created Power BI dashboards to transform complex data into clear, actionable insights for stakeholders.
- Performed data cleaning and transformation to ensure data accuracy and consistency across reports.
- Built foundational skills in data analysis, visualization, and reporting workflows.

Technical Skills

Data Analysis: SQL, Excel (Advanced, VBA, Power Query), Python

Data Visualization: Power BI (DAX), Tableau

Reporting & Performance: KPI Scorecards, Trend Analysis, Performance Reporting, Data Quality Management

Data Platforms: Snowflake (Basic), SQL Databases

Other Tools: Git, Jupyter Notebook, Excel Macros

Concepts: ETL Processes, Workflow Automation, Stakeholder Communication, Process Improvement

Projects

Customer Experience Analytics Dashboard

Power BI, SQL, Excel

- Designed an interactive dashboard to track customer satisfaction, feedback patterns, and service performance metrics.
- Used SQL and Excel based data preparation to clean, validate, and structure datasets for reliable reporting.
- Created KPI views, trend analysis, and variance analysis to identify customer experience improvement opportunities.
- Developed data validation checks to ensure measurement accuracy and reporting consistency.
- Presented insights through clear visualizations to support stakeholder discussions and action planning.

Performance KPI Dashboard & Reporting Automation

Power BI, SQL, Excel

- Tracked and Investigated KPIs through Power BI dashboards to identify performance trends, gaps, and improvement opportunities.
- Performed trend and variance analysis to identify performance patterns and support strategic planning.
- Automated recurring reports using Excel Macros, reducing manual preparation effort by 25%.
- Cleaned, transformed, and validated datasets using Excel, Power Query, and SQL to ensure data accuracy.
- Converted complex data into easy to understand dashboard views for business users.

Tableau Dashboard of British Airways Reviews

Tableau, SQL, Excel

- Built interactive Tableau dashboards to analyze customer review data and service satisfaction trends.
- Queried and cleaned data using SQL and Excel to ensure consistency and reliability.
- Analyzed customer sentiment and review patterns to identify key service improvement areas.
- Designed dynamic filters and KPIs to compare ratings across routes, classes, and time periods.

Education

MSc. Mathematical Modeling, Simulation and Optimization

University of Koblenz

Koblenz, Germany

Oct 2022 – Present

Relevant Coursework: Machine Learning, Big Data, Data Science, Artificial Intelligence, Multi-objective Optimization

Bachelor of Engineering in Mechanical Engineering

Government Engineering College, Bhavnagar

Bhavnagar, India

Aug 2016 – Sep 2020

Relevant Coursework: Numerical Methods, Computational Fluid Dynamics, Machine Design, Applied Thermodynamics

Languages

English (C1 – Professional Proficiency) | German (B1 – Improving towards B2)
